Nodejs

Javascript

I recently Graduated from Georgia State University with a bachelor of Neuroscience. I was part of the Men Ultimate Frisbee Club as well as the Collegiate Neuroscience society all four years at my school. This lead me do a lot of volunteer experience outside of school. This past year I have been working at cvs as a pharmacy Technician. With the whole Covid-19 event, I have since transitioned to doing Covid testing at the GA tech site full time. I get to do a lot of swabbing and do testing. Outside of works, I like play a lot of instruments and video games. As of 2021, I signed up for a coding boot-camp and I am on my path to becoming a full-Stack developer.

## Projects

2021-06 -

Current

### Developer

*Project, Atlanta, GA*

This project will allow users to search for Breweries based on cities and states. In addition, the user will have access to the Wikipedia pages of the breweries (if it exists), cities and states.

- Fetch nation-wide brewery information with OpenBreweryDB API, searching by city or state.
  - Retrieve, parse, format Wikipedia pages with ajax call to MediaWiki API. Queries formatted to avoid article ambiguity.
  - Search history held with localStorage. Search information passed to search
  - html via localStorage. Page for Top 9 Breweries in entire country with Google Maps built in. Page for full detailed search results, with alternating styles.
- Responsiveness throughout the entire website. Focus indicators for many elements.

## Education

2015-08 -

2019-07

### Bachelor of Science: Neuroscience

*Georgia State University - Atlanta, GA*

2021-06 -

2021-08

### No Degree: Full-Stack Development

*Georgia Tech - Atlanta, Ga*
